#### **DETAILED ACTION**

## Response to Arguments

Applicant's arguments with respect to claims 1-25 have been considered but are most in view of the new ground(s) of rejection.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 17 recites the limitation "the summation junction" in line 2. There is insufficient antecedent basis for this limitation in the claim.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 2817

Claims 1-4, 10-14, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Carvers (5,489,875).

Regarding claims 1-4, 10-14, 18-20 Carvers (Figs. 4, 12) discloses a feedforward amplifier comprising: a controller (CT3) can be read as control circuit, wherein the schematic of controller (CT3) shown in (Fig. 12) comprises a power detector (PDI) which detects peak power and the control signal from controller (CT3) control GAIN and PHASE ADJUSTMENT. The functions of these claims would be inherent in the reference circuit.

Claims 5, 6, 10-14, 21-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoo et al. (6,232,837).

Yoo et al. (Fig. 1) disclose a feedforward amplifier comprising: a controller (23) can be read as control circuit; power detector (18/22); and gain and phase (8, 9, 12, 13). The functions of these claims would be inherent in the reference circuit.

# Allowable Subject Matter

Claims 7-9, 15-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Art Unit: 2817

Claims 7-9, 15, 16 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 7-9, 15, 16 call for, among others, a schematic of the control circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Fukuchi (5,617,061); Cova et al. (6,104,241)) shows further analogous prior art circuitry.

This art is deemed relevant and should be carefully reviews before any amendment is filed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh V. Nguyen whose telephone number is (703) 306-9058. The examiner can normally be reached from 8:00 AM-4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (703) 308-4909. The fax phone numbers for the organization where this application or proceeding is

Application/Control Number: 09/837,850
